**Subject:** FW: Mitigation - Attachment Clean.docx  
**Attachments:** Mitigation - Attachment Clean.docx; 404g Mitigation Considerations Table OptSel 2\_Clean.docx

Hi,

I made OGC's changes to the table, moved the description at the top of the issue paper (this was the only difference between the table and the issue paper I saw so reduced to one document), and unbolded one of the issues as the bolded preference did not seem to be supported by the considerations post workgroup discussion.

I also notated that the Army has agreed to include regulatory text to their rule – a huge uncertainty prior to late last week. Thus, I tweaked the mitigation attachment to reflect that and removed workgroup recommendations keeping it more general at this point.

I think what I have included is true to workgroup input, OGC language, and management direction.

Sending these to you directly since you worked on these so you need not plow through all the issue papers.

- Kathy
